As per the problem statement, we have divided analysis into three sections: -

1. Wine Review Data Analysis:

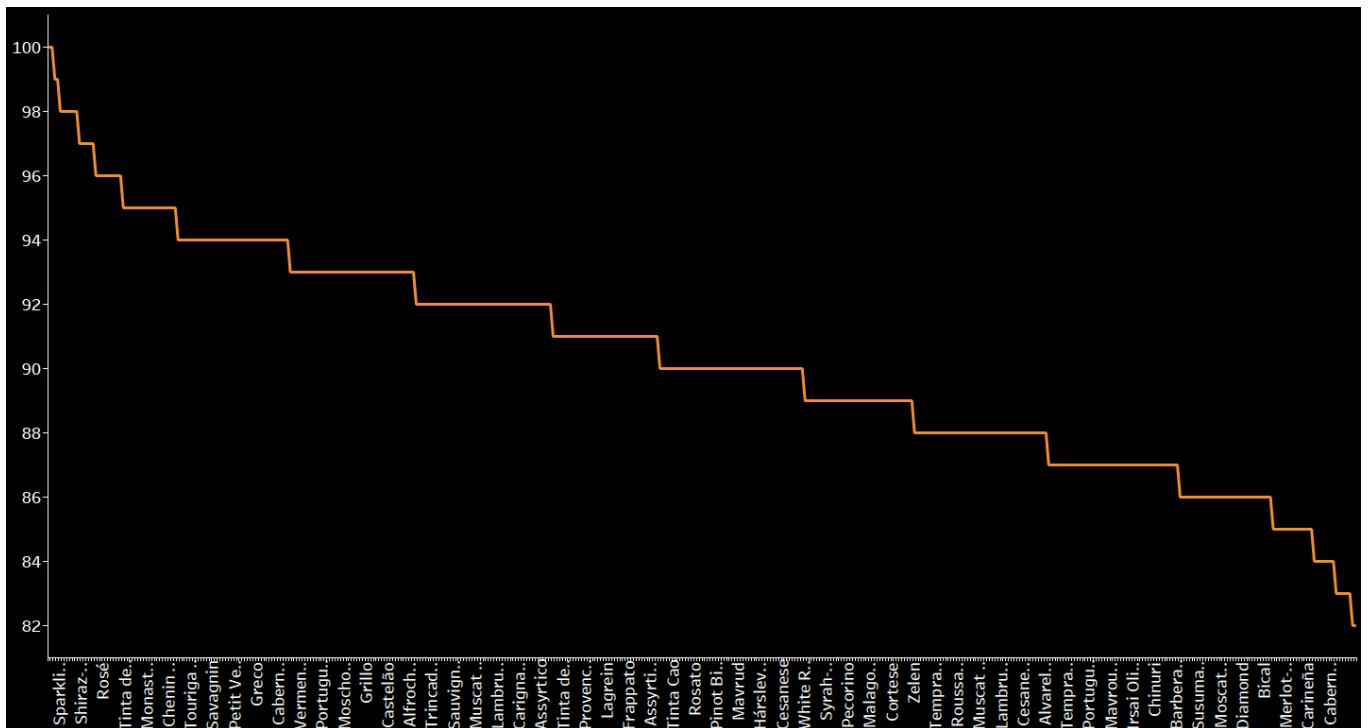

In this section we designed our first dashboard and tried to interpret the followings

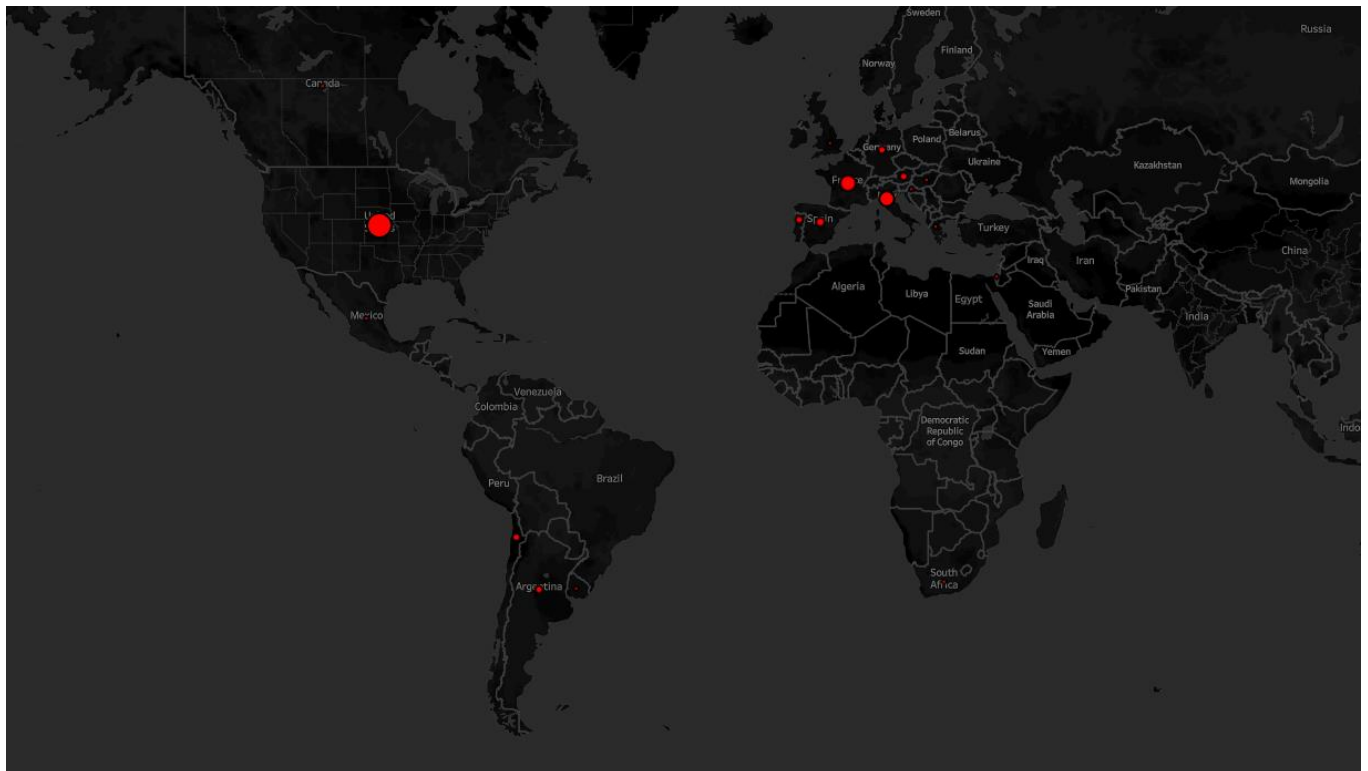

✓ Relation between Countries and Average Wine Points

✓ Relationship between Variety and Maximum Points

✓ Relation between Countries selling most wines

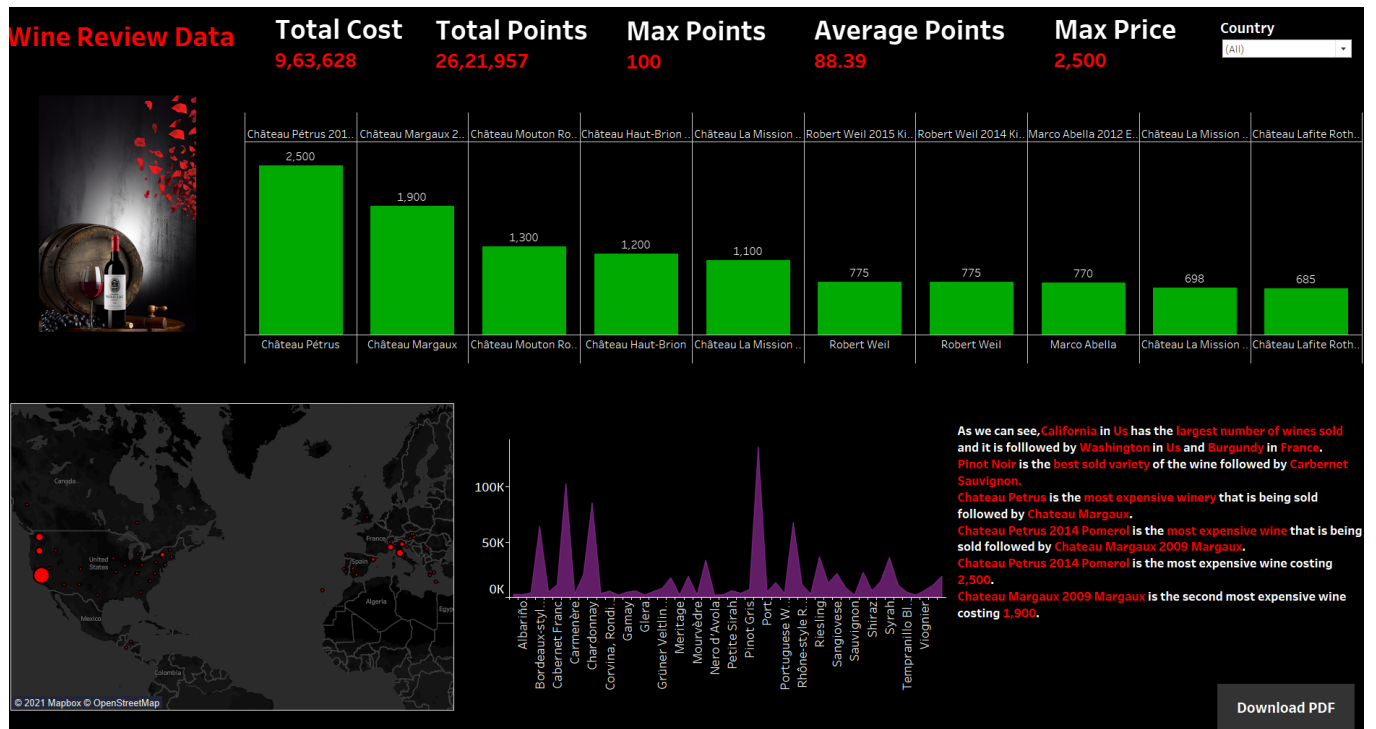

✓ Relationship between Taster and Reviews Done

✓ From above dashboard we can come to this conclusion

As we can see, **US** has the largest number of wines sold followed by **France** and **Italy**.
Prugnolo Gentile and **Muscat** are the variety of wines that holds **maximum points(100)**.
Average points of the wine is **88.39**.
There are around **14 countries** that have **above average points** with **England** and **India** at highest.
Roger Voss is one of the **best taster** of wines.
Roger Voss has tasted most number of wines of around **5,904**.
Roger Voss is followed by **Michael Schachner**.
Michael Schachner is the **second leading wine taster** with around **3,583**.

2. Best Variety and Winery

Here, we have our second dashboard and interpret the followings--

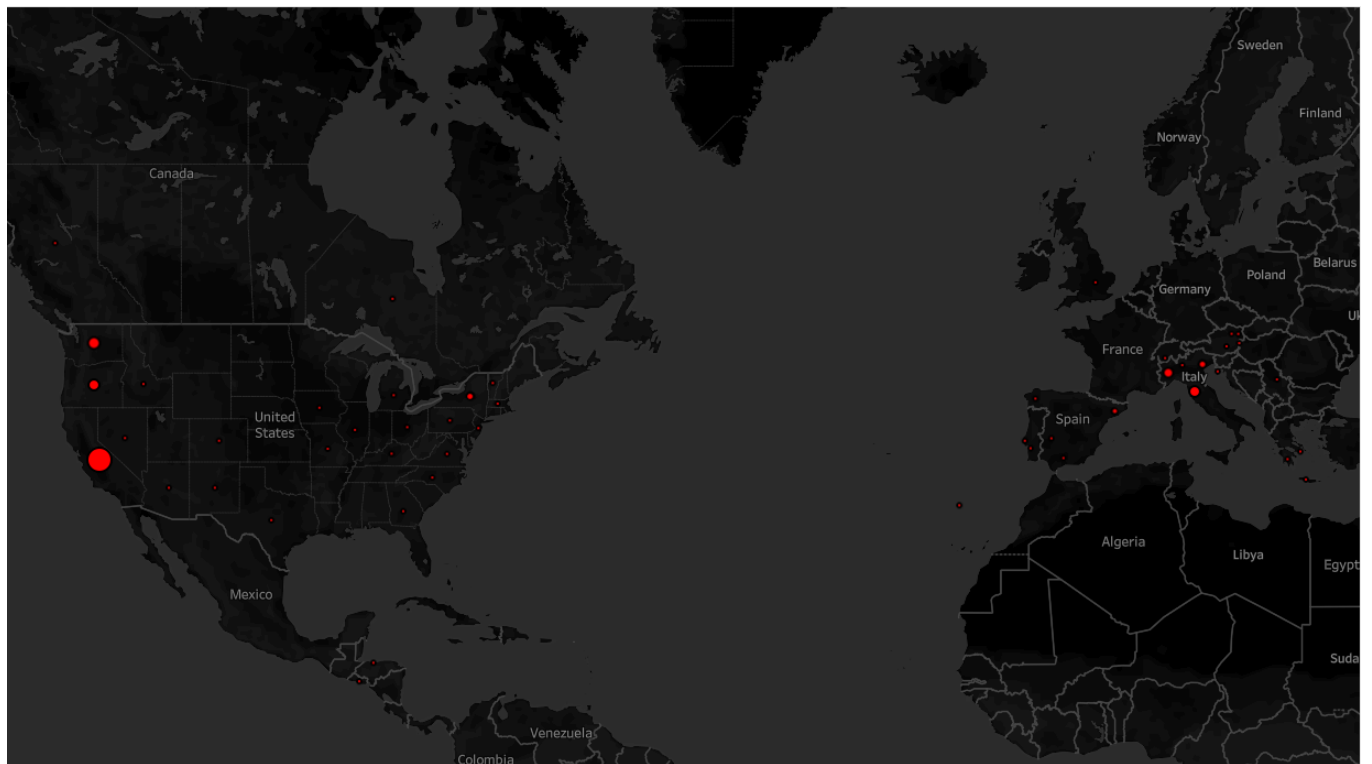

✓ Best Winery with maximum price

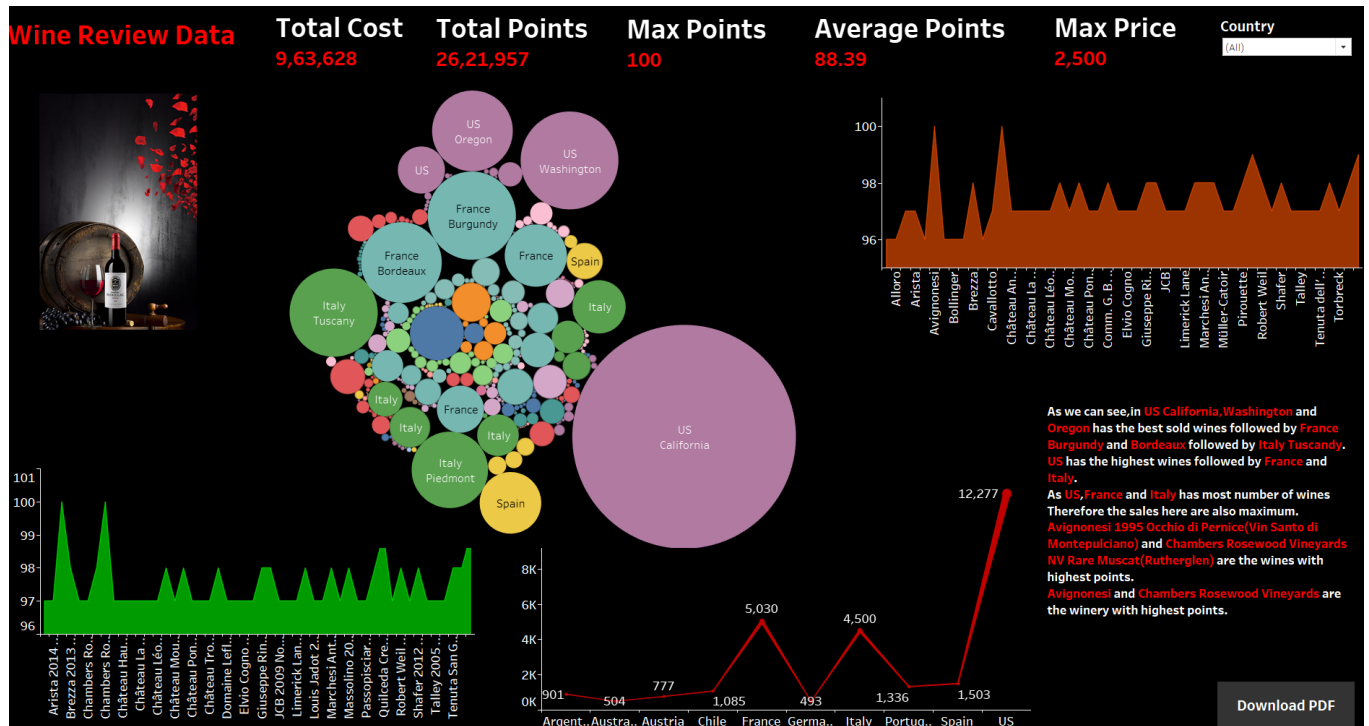

✓ Relation between Variety and Price

✓ Relation between Province and wines sold

3. Winery with point

Here, we have our third dashboard and interpret the followings—

- ✓ Province selling most wines

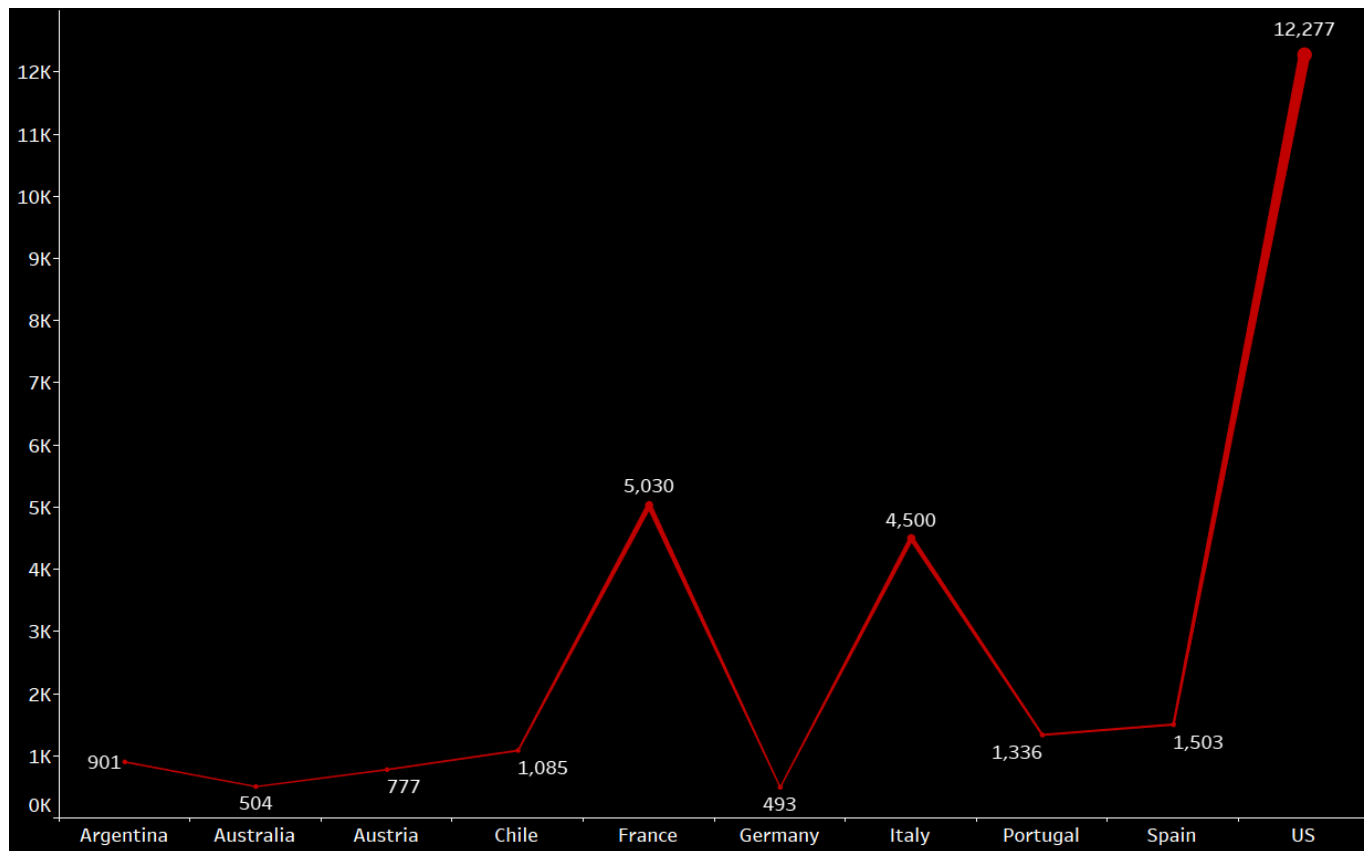

✓ Relation between Winery and points

✓ Relation between Title and Maximum points

- ✓ Relation between Country and most wines available

- ✓ Wine Data with respect to Country

Wine Review Data	Total Cost	Total Points	Max Points	Average Points	Max Price	Country
	9,63,628	26,21,957	100	88.39	2,500	(All)
